DO IT YOUR SELF
Audioledcar is founded with the target of offering automotive’s accessories in a different way until the present.

Based in Madrid, the company has expanded its portfolio of products to offer a complete online accessories’ selling service at the national and international level.

Due to the constant incorporation of new products to the catalogue, it has become possible for Audioledcar to be the single-sourcing of distributors, repair workshops, private costumers, and professionals of the industry.

The brands Zesfor and Wrapworkers have been incorporated to our portfolio to cover all kinds of needs raised by the market demand of auto accessories and by the best professionals of the automotive sector, who were looking for fast-moving goods.

LED ILLUMINATION

LED illumination is an outstanding revolution that provides multiple advantages to the consumer: it improves significantly the visibility, increases the user’s safety, and reduces the electric consumption of the vehicle. Audioledcar invests its efforts in the highest technology and the best innovation. We offer the greatest portfolio LED illumination. Ideal for all kinds of vehicles, the LED illumination respects the european normative and the environment. Our Zesfor’s range of references will exceed all consumer’s expectations. Check out our portfolio and choose the references that adjust the most to what you need.
ZESFOR®’s ANGEL EYES for BMW

- No mistake of burnt out light (CanBus)
- Approved for the TÜV
- LED reduction for day/cross lights
- Available in different powers
- Original mooring and cancelers
- Plug & Play
- Lights with LED Cree®
- CCFL and SMD halo rings

ZESFOR®’s LED FOG LIGHTS KIT

Valid for fog and bend lights. Invalid for cross or long lights.
We owe 3 ranges of led lights with different lumens:
- **Led fog smd lights kit**: They illuminate less than a regular light, and it is necessary to add anti failure resistances to avoid a burnt out light in cars with CanBus technology.
- **ZesfOr ®’s Fog 30 Watts lights Kit**: They illuminate almost as much as a regular light would. Made under CanBus technolog to avoid a burnt out light.
- **ZesfOr ®’s 60 Watts fog lights Kit**: They illuminate more than a regular light. They include anti failure resistances to avoid a burnt out light in cars with CanBus technology.

ZESFOR®’s LED LIGHTS

ZesfOr’s LED lights are the result of years of investigation and research. They are made under the most strict standards of quality always using the best materials.

Due to their Taiwan technology chips, their LED diodes of ceramic base, and its meticulous assembly with microcircuits, there have been achieved LED lights with high benefits.

- Chip 1819549N of Taiwan technology.
- Ceramic base.
- LED Smd diode, Cree and Cob.
- CanBus circuit patented.
- More than 200 references available.

THE 8 MOST FREQUENTLY ASKED QUESTIONS ABOUT LED:

1- Can I install LEDs in any vehicle?
Yes, you can.

2- Where can I put LED lights?
You can put it in a number plate, interiors and front.

3- Do I have to modify the vehicle’s installation to put LEDs?
No, you just have to put off the halogen light and replace it for a LED.

4- Can a LED cause a short-circuit?
ZesfOr®’s LEDs have included a microcircuit of safety that avoids unwanted situations.

5- What does CanBus mean?
It’s a protocol of vehicle’s communication. This technology warns out about the mistake of a burnt out light, and if you install LEDs, the car will detect them as if it was burnt out. To fix it, install ZesfOr®’s CanBus LED lights.

6- How do I know if my car is CanBus?
Most of the vehicles made since 2006 have been made with CanBus technology. In case of doubt, install the CanBus lights, because even if your vehicle is not CanBus, nothing wrong will happen.

7- Can a LED use up the car battery while not being pulled up?
No, it can’t, it would need at least a year to make it happen.

8- I have installed my LEDs and they look lighted up in the off key position
The circuit of the car contains waste energy that gets consumed with the pass of time. To avoid this, you should install the CanBus’ LEDs.
ZESFOR®’s LED INDICATORS LIGHTS

- Approved for the TÜV
- They increase the visibility a 50%.
- CanBus technology.
- Durability: +5000 hours
- Made with alluminium

Audioledcar offers halogen illumination from the ZesfOr®’s brand, known for being made under the highest quality standards, and always respect the European normative and environment.

These halogen lights will light as much as the original automobile’s lights would do, but they will highly improve its aesthetic. You can find in our catalogue these three types:

1) Xenon effect - White color
2) Retro effect - Strong yellow
3) Yellow halogens - Normal yellow colour

What is liquid vinyl?
It’s a kind of paint that can be applied directly over any surface and once it’s dried out, it can be moved away as if it were a vinyl stick.

Must I sand or pretreat the surface?
No, you just have to clean out the surface.

What’s the final texture?
WrapWorkers®’s gives a perfect plain result.

Types:
- 400 ml sprays to be applied directly,
- 4 L. bottle to be applied directly with a gun

For a perfect fluoride WrapWorkers®'s colour you must apply it over a white basis. In case of not having it, you can always apply first the WrapWorkers®'s white vinyl and then apply the fluoride colour.

We recommend its use in areas that will not get much solar radiation exposure.

For a perfect WrapWorkers®'s chameleon colour, it is necessary to apply it over a black basis. In case of not having it, you can always apply first the black WrapWorkers®’s vinyl and then apply the chameleon or photoluminescent vinyl.

*VAT included in every product. The prices can suffer changes or variations.

LIQUID VINYL

We recommend the Workers®’s Pre-Cleaner product to get rid of any kind of waste that could affect the attributes of the WrapWorkers®’s liquid vynil.
Adhesive vinyls designed to be installed directly over any plastic or metal surface.

Due to its adhesive layer patented by the High-Match®’s brand, you can get a maximum adhesion without hurting the surface or painting. They also have included the Air-Drain®’s technology that avoids the creation of bubbles for an easy and fast installation.

The medium length of the vinyls goes from 4 to 5 years, and they resist any kind of weather situation.

Specific and complete diagnosis machines for cars. In Audioledcar you will be able to find a large range of products intended for big or small repair workshops, and also for amateur users enthusiastic about the mechanical world. We have a team of engineers and a technical department of updates totally free ready to help you out anytime.
ICARSOFT is an Asiatic brand that offers two kinds of diagnosis machines:
- Specific: Only valid for a brand.
- Universal: It encompasses all brands.

**What can it do?**
It can read, diagnose and delete all the failures that a vehicle could suffer from. Icarsoft is able to diagnose most modules that make up a vehicle.

**Languages?**
English and Spanish.

**How is it updated?**
It can be updated via online through the Icarsoft's website. The updates are free during the first year.

Scan this bidi code with your smartphone and take a look at the ICARSOFT’s functions
